Employer: _____ Position Title: _____

Please select **one or more** specialty/disciplinary areas.

- ☐ Food Safety
- ☐ Public Health
- ☐ Epidemiology
- ☐ Other: _____

Please describe the objectives of a veterinarian meeting this shortage situation as well as being located in the community, area, state/insular area, or position requested above (limit your response to 200 words or less).

1. Establish a rural veterinary practice in Randolph, Utah to serve the private practice needs of Rich County which produces over \$15 million in livestock revenue annually.
2. Accreditation for the practicing veterinarian in order to address program disease needs of federal and state governments. As an example, tuberculosis and brucellosis program monitoring and testing.
3. Act as a professional resource to the community regarding zoonotic and foreign animal diseases.
4. Address the companion animal needs of the ranching and farming communities, along with those needs of the small, rural municipalities in this area in reference to their public health, rabies and pet over population mandates.
5. Provide veterinary services for the regions around Bear Lake State Park that is a major tourist attraction in the state of Utah.

Please describe the activities of a veterinarian meeting this shortage situation and being located in the community, area, state/insular area, or position requested above (limit your response to 200 words or less).

The needed services in this area would be a mixture of livestock, equine and small animal medicine. This county is traditionally under serviced because the only currently available veterinary assistance travels from Evanston, Wyoming and only serves the cattle industry.

Please describe any past efforts to recruit and retain a veterinarian in the shortage situation identified above (limit your response to 100 words or less).

The economy of Rich County is still based on farming and ranching. Any efforts to attract a veterinarian to this area have been unsuccessful because of the income needed to meet current student loan obligations of new graduates.

Please describe the risk of this veterinarian position not being secured or retained. Include the risk(s) to the production of a safe and wholesome food supply and to animal, human, and environmental health not only in the community but in the region, state/insular area, nation, and/or international community (limit your response to 250 words or less).

Because of the veterinary shortage in this area, many food animal related issues have become problematic. As an example, in order for cattle to be shipped properly between states, certificates of veterinary inspection are needed to accompany the cattle. Due to the shortage of veterinarians, this is often overlooked and has become a problem in this region. Also because of state licensing requirements, the practice from Evanston, Wyoming continues to have difficulty in serving this area.

Please indicate whether you consider this situation/position a candidate for a "service in emergency" agreement (limit your response to 100 words or less). Please see solicitations for additional information regarding the obligation of participants who enter into the "Service in Emergency" agreement. [LEAVE BLANK – NOT FOR IMPLEMENTATION IN 2010]

Authorized State or Insular Area Animal Health Official or designee:

Name: Bruce L. King, DVM
Title: State Veterinarian
Organization: Utah Department of Agriculture and Food
Email: bking@utah.gov
